

WASTE FACTS & FIGURES

-  About one-third of an average landfill is made up of packaging material.
-  Each year, more than 1.9 million tons of recyclable materials are disposed of in landfills.
-  In a lifetime, the average American will throw away 700 times his/her adult weight in garbage. If you add it up, this means that a 150 lb. adult will leave a legacy of 90,000 lbs of trash for his/her children.
-  On average, each one of us produces 4.4 lbs of solid waste each day. This adds up to almost a ton of trash per person, per year.
-  Out of every \$10 spent buying things, \$1 (10%) goes for packaging that is thrown away. Packaging represents about 65% of household trash.
-  The average baby generates a ton of garbage every year.

TIP: Think before you throw.
Before you trash the banana peel, yogurt tub or plastic film, think about the proper way to recycle or dispose of your waste.
